

MHS stands firmly with the people of the Ukraine.

We are deeply disturbed by the actions of the Russian state. No free nation should be invaded by another nation state.

Effectively immediately, we have suspended all direct to sales of MHS products and services to customers in the Russia and Belarus economic zones with one exception. Some of MHS' assessment tools support the most vulnerable and at-risk populations, specifically children with mental health issues. MHS has made the decision that these children should not suffer further because of the illegal actions of their government. As a result, access to these products to registered psychologists will continue at no charge.

In support of the people of Ukraine, MHS is working with our partners in Poland to facilitate the free use of our mental health tools enabling Polish Psychologists to support the mental health needs of Ukrainian refugees. We believe this will allow our business partners to deliver effective and timely mental health support to those who have been forced to flee their homeland and to suffer unquestionable trauma as a result of the illegal actions of the Russian state.

We ask that our clients and partners join us in our support of the people of the Ukraine.

Regards,
