To Whom It May Concern:

MHS engaged Diverse Computing Inc., through its CJIS ACE Services to assist the company in compliance with the mandatory controls of the CJIS Security Policy applicable to the services MHS provides.

Diverse Computing personnel include former FBI APB members, Security and Access Subcommittee members and are experienced in Information technology development, configuration, implementation, and audit within CJIS-compliant law enforcement/criminal justice agencies.

MHS has completed the CJIS ACE compliance profile/mitigation strategy process, the first and only industry standard CJIS assessment of an organization's process for compliance in accordance with the FBI CJIS Security Policy. Upon completion, MHS was awarded the official CJIS Compliance Seal, the closest thing to CJIS Certification available within the industry.

While no official process exists to achieve "CJIS Certification" or a formal CJIS Compliant Attestation like in other areas of government and industry (e.g. IEEE, ANSI, etc.), CJIS ACE has reviewed MHS' policies and operations and has awarded its CJIS-Ready Seal, confirming that MHS has completed the CJIS ACE Compliance process. With its commitment compliance, MHS is dedicated to adherence to the CJIS Security Policy.

If you have any questions regarding our processes, please let me know.

Sincerely,

LARRY COFFEE
